An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sally Swedberg on January 13, 2004.

The application has been amended as follows:

IN THE CLAIMS:

Claim 7 (Amended): A method of analyzing gas contaminants that are generated from an article ~~that is located within an environment~~, said method comprising the steps of:

(1) attaching a portable chamber sealably to said article;

~~(1)~~ (2) performing a mass spectrometric analysis of the ~~environment~~ atmospheric gases external to the chamber;

~~(2)~~ (3) performing a mass spectrometric analysis of gas emanating from the article; and

~~(3)~~ (4) comparing the analyses from steps ~~1~~ 2 and ~~2~~ 3 to determine what gas contaminants, if any, are generated from the article.

Claim 8 (Currently amended): The method of claim 7 wherein step ~~2~~ 3 is performed with an apparatus that comprises:

a portable housing that has a chamber which is in communication with a port that is sealably attached to a surface of the article;

a mass spectrometer that is coupled to the chamber for analyzing gaseous materials in the chamber; and

means for generating a vacuum within the chamber to draw outgas contaminants from the surface of the article into the chamber; and

transferring the outgas contaminants from the chamber to the mass spectrometer for analysis.

Claim 14 (Currently amended): The method of claim 8 wherein step ~~2~~ 3 comprises:

(1) positioning the port on a surface of the article;

(2) creating a vacuum within the chamber whereby gas from the surface is drawn into the chamber; and

(3) analyzing the gas in the chamber with the mass spectrometer.

The following is an examiner's statement of reasons for allowance: The prior art does not teach to sealably attach a portable chamber to an article in order to perform a mass spectrometric

analysis of gases emanating therefrom, or to compare this analysis to that of atmospheric gases external to the chamber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bather discloses a sampling means for a mass spectrometer that comprises a perforated tube 25 that contacts an article (suitcase 27) to draw gases emanating from the sample, but Bather does not teach to provide means to seal this tube against a surface of the article.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack I. Berman whose telephone number is (703) 308-4849. The examiner can normally be reached on M-F (8:30-6:00) with every second Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R. Lee can be reached on (703) 308-4116. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9318.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
